iOS Developer

SUMMARY

Skilled iOS Developer with 2 years of experience in Xcode, Swift, SwiftUI, Objective-C, and iOS frameworks. Proficient in designing intuitive UIs, implementing in-app purchases and push notifications, and integrating Django Python APIs for scalable backend support. Strong problem-solving skills with a focus on delivering high-quality, user-friendly applications that meet client and end-user needs.

WORK EXPERIENCE

Nexdha AI Fintech Private limited

Dec 2022 - Present

iOS Application Development

- Spearheaded the development and optimization of iOS applications using Swift, SwiftUI, and iOS frameworks to deliver high-performance, secure, and user-focused solutions.
- Built an admin iOS app leveraging Storyboard, streamlining back-office workflows and improving operational efficiency.
- Implemented advanced features such as in-app purchases, push notifications, and intuitive user interfaces to enhance app functionality and user engagement.

Web Development with Backend Integration

- Designed and implemented a dynamic website UI integrated with a scalable backend using the Django framework, ensuring seamless functionality and robust data management. Collaborated with a team to implement key features and functionality, ensuring a seamless user experience.
- Developed end-to-end solutions for educational workflows, focusing on usability and efficient backend support.

Cross-Functional Collaboration

- Collaborated with product teams to analyze requirements, design features, and ensure high-quality deliverables aligned with user expectations.
- Applied strong problem-solving skills to address technical challenges and optimize app performance.

Key Contributions

- Consistently delivered projects within deadlines while maintaining superior quality standards.
- Focused on creating scalable, maintainable, and future-ready solutions that align with business objectives and industry trends.

EDUCATION

BE-Electrical and Electronics Engineering

Completed in 2022

Govt College of Engineering, Tanjavur

ADDITIONAL INFORMATION

Swift: Proficient in Swift programming language for iOS app development, with a strong understanding of Swift syntax, frameworks, and best practices.

SwiftUI: Proficient in SwiftUI framework for developing modern and responsive user interfaces for iOS applications.

Django: Skilled in building web applications using the Django framework, proficient in creating models, views, and templates, and implementing robust backend logic.

Python: Experienced in Python programming language, including its core concepts, data structures, and libraries for web development, scripting, and data analysis.
